DANS PİSTİ DANCE FLOOR

Güçlü alüminyum çerçevesi karkas üzerine monte edilmiş, hafiflik ve dayanıklılık sağlayan kontraplak taşıyıcı tablası vardır. Bunun üzerinde 8 mm aşınmaya dayanıklı (12000 taber) laminant parke kaplanır. Zeminden gelecek neme karşı alt kısım neme dayanıklı vernikle kaplanır. Birbirine geçen alüminyumdan profillerin dairesel kesiti sayesinde (firmamızın özel patentidir) oynama, kayma söz konusu değildir. Bu sebeple de alyan vidalarla tekrar sıkılması gerekmez.

Light and enduring plywood panels on strong aluminium frames. On top of panels there are laminate parquets 8 mm (12000 taber). Bottom is varnished with a strong varnish against humidity. Due to aluminium circular cross section frames (exclusive patent of our company) the dance floors do not move or slide. Therefore, no need to be squeezed with a screw bolt
