PRIDE OF PLACE

Carrs Silver is an established, privately owned, family-run company with our head office and manufacturing facilities based within the city of Sheffield; a place which has been at the very heart of the cutlery industry for centuries. We are proud to be associated with the city's industrial heritage and its global reputation for manufacturing excellence. Maintaining this tradition of producing cutlery of the very finest quality could not be achieved without the care and attention to detail, displayed by our dedicated employees.

Whilst we have preserved many of the traditional hand skills and crafts involved in the manufacture of cutlery, our philosophy has always been to encompass new and innovative techniques and technologies.

Carrs expertise has enabled the compilation of this catalogue, which features a selection of timeless cutlery designs aimed to impress and enhance the dining experience of even the most discerning of patrons.

Our extensive and unparalleled range of both dining and serving pieces will further enhance those crucially important presentational and ambience factors, by allowing the selection of a comprehensive range of pieces, precisely tailored to your individual requirements.

We have worked tirelessly over the last 25 years, both here in the UK and internationally, to establish a high reputation for the Carrs brand, based on exceptional quality and customer service. Our retail customers include Harrods, Selfridges, Liberty and Fortnum & Mason in the UK and Bergdorf Goodman and Neiman Marcus in the USA. We have also established an elite client list across the globe, including many Royal Families, who demand the very highest of quality from our bespoke services.

I trust this brochure will emphasise our ability and commitment to deliver the most exacting standards possible, of both product and customer service.

Richard Carr

Carrs expertise has enabled the compilation of this catalogue, which features a selection of timeless cutlery designs aimed to impress and enhance the dining experience of even the most discerning of patrons.

VISION OF
EXCELLENCE

Being a restaurateur, demands total commitment, attention to the smallest of detail in order to achieve the highest of standards. At Carrs, we share your vision of excellence, your passion for perfection. We want to be a part of your aspirations and determination to create the ultimate dining experience and truly believe that our superb cutlery collections have a significant role to play in realising your vision.

Our new brochure embraces cutlery designs of both traditional and modern styling. If you wish something more unique and personalised, our bespoke option service will advise and create a look just for you.

Whether you are opening a new restaurant, re-styling an existing establishment or you wish to upgrade or replace your present cutlery, our dedicated cutlery specialists based in London, will always deliver a professional, efficient and personal service, that is fully supported by our experienced technical and production.

We share your
vision of excellence,
your passion for
perfection.

CUTLERY DESIGNS

Each design has been carefully chosen to complement any distinctive style of restaurant or dining room.

The Carrs Tableware collection of inspiring cutlery designs is illustrated over the following pages. Each design has been carefully chosen to complement any distinctive style of restaurant or dining room.

All our cutlery designs are represented by an exceptional range of dining pieces, allowing the opportunity to create the perfect table setting of your choice.

Emphasising quality, Carrs cutlery is offered with exclusive standard features, for example, weighted knife handles. Further enhancements and customisations may also be applied from the many bespoke options we are able to achieve.

— 289mm		— 157mm	

Bespoke Options

There are a number of distinctive options available to enhance your choice of cutlery and add those critical elements of individuality and design co-ordination to your table presentation. From the application of an elegant crest or monogram, to the luxurious embellishment of pure gold, these specialist techniques are individually tailored to your exact and specific requirements.

Knife Blade Style

In addition to the Carrs standard 'Finger point' style of knife blade, we have two further style options, namely, 'Slipper' and 'Pallet' which may be applied to most of the Carrs cutlery designs.

From the application of an elegant crest or monogram, to the luxurious embellishment of pure gold, these specialist techniques are individually tailored to your exact and specific requirements.

Knife Blade Finish

As an alternative to the customary highly polished stainless steel blade, we are able to apply a subtle, matt effect, ‘Buffed Finish’. This is sometimes referred to as ‘Hotel Finish’ and displays an attractive contrast to the brightly polished knife handle.

Polished

Buffed (Hotel Finish)

Knife Blade Etching

Knife blades may be permanently customised by using the technique of electro-chemical marking or ‘Etching’, as it is usually termed. Within certain size and detail parameters, any design of brand identity, may be applied. The monochrome image produced by the etching process, creates a highly distinctive contrast with the polished or matt finish of the blade.

Engraving

Our engraving expertise has been achieved over many years, by working to the most exacting of detail and standards demanded by clients of our bespoke product services. The engraving of crests, monograms, logos and brand marks can be realised by our skilled technicians, requiring only the minimum of artwork.

Gold Embellishment

To create an ambience of ultimate luxury and opulence, the option of applying a rich coating of 24ct gold is available. All items of cutlery (excluding knife blades) may be totally gold plated, or alternatively, the gold is applied only to highlight particular decorative details of the cutlery design.

PVD Coating

Physical Vapour Deposition (PVD) is a relatively new process of applying a decorative, hardwearing and stain resistant coating to cutlery (Stainless steel only), with a range of colour options.

Metals

925 Sterling Silver

For the ultimate dining experience, solid silver cutlery creates a memorable and lasting impression of occasion. Each item of cutlery is marked with the Hallmark of the official UK Assay Office, guaranteeing that it conforms to the legal standards of fineness and purity. Sterling Silver has a minimum of 925 parts purity out of 1000, the remaining part containing metals such as copper to improve malleability of the silver during manufacture.

Over a period of time, the silver cutlery displays a most attractive surface finish termed a 'patina', which is an optical effect, created by the multitude of very fine scratches that develop during use.

EPNS Silver Plated

The base materials of EPNS – electro plated nickel silver, are copper, zinc and nickel. This alloy displays superior properties of strength and durability required for the manufacture of high quality cutlery as well as providing the best conditions for adhesion of the pure silver coating. When developed, the alloy was named 'nickel silver' simply because of its silvery appearance. Pure silver is deposited onto the surface of the nickel silver cutlery by the process of electro plating to our standard thickness of 20 microns.

With use, silver plated cutlery will also display the same aesthetically pleasing patina characteristic of sterling silver cutlery.

18/10 Stainless Steel

Stainless steel cutlery is strong, highly resistant to staining, scratching and abrasion. The 18/10 refers to the 18% chrome and 10% nickel content of this high grade stainless steel alloy which also produces a bright silvery sheen when expertly polished during the manufacturing process.

Knife Blades

All knife blades are made from a harder grade stainless steel, which gives the hardness necessary for a lasting cutting edge and the flexibility required from a blade.

Quality Standards

All cutlery manufactured by Carrs is made to the highest and most exacting standards of quality possible.

Metals and materials used in its manufacture are either fabricated in-house from raw materials or sourced from only the most reliable of suppliers, fully supported by all relevant details of conformity.

Throughout the production cycle, each item of cutlery is inspected at every stage to ensure it meets all aspects of its specification and most importantly, the final approval and satisfaction of our customers.

Samples of our products are regularly tested in accordance with all relevant British and International Standards using approved, independent testing facilities.

Refurbishment

High standards of presentation may be difficult to maintain when eventually the appearance of your dining cutlery suggests an upgrade is required.

The refurbishment and restoration of your existing cutlery is a cost effective solution to this problem. The bespoke service offered by Carrs, will return your cutlery to a highly acceptable or a near-new quality of finish, depending on the level of restoration work requested.

Should you wish to use this service, a member of our team will fully explain the services we are able to provide and assess your individual requirements.
